IBM SPSS Statistics is a collection of products used to access and manage data, select and perform analyses, and share results. It is available on computers throughout the University Libraries.

In this workshop, attendees will learn how to perform correlation and regression analyses in SPSS. This workshop is presented by the University Libraries and the College of Education Research Assistance Center, and the instructor is Dr. Sara Tomek, the center’s director.

**Friday, March 27**
12:00 p.m. – 1:00 p.m.
McLure Library
Room 33

New to SPSS? Don’t miss Get to Know SPSS (2/9) & Introduction to SPSS (2/13)
