ArcGIS is a suite of software used to create and use maps, compile geographic data, analyze mapped information, share and discover geographic information, and manage geographic information in a database. It is available in Gorgas and Rodgers libraries.

This workshop will provide an introduction to the ArcGIS ArcMap software. It will cover basic skills such as creating a map, adding simple data layers, examining the data layers, adding essential map elements, and printing and exporting the map. This workshop is presented by the University Libraries and the Department of Geography, and the instructor is Dr. Steven Ericson, an instructor in the department.

Thursday, February 26
2:00 p.m. – 3:30 p.m.
Rodgers Library
Scholars Station

Thursday, March 26
3:30 p.m. – 5:00 p.m.
Rodgers Library
Scholars Station
