

ARCGIS

STORY MAPS

INTERACTIVE WEB MAPS WITH ARCGIS ONLINE

ArcGIS is a suite of software used to create and use maps, compile geographic data, analyze mapped information, share and discover geographic information, and manage geographic information in a database. It is available in Gorgas and Rodgers libraries.

This workshop will provide an introduction to story maps, interactive web maps created with Esri's cloud-based mapping and GIS system, ArcGIS Online. Attendees will learn how to create and publish online maps combining text, photos, video, and audio. This workshop is presented by the University Libraries and the Department of Geography, and the instructor is Dr. Steven Ericson, an instructor in the department.

Thursday, February 5
3:30 p.m. – 4:30 p.m.
Rodgers Library
Scholars Station

Thursday, April 16
2:00 p.m. – 3:00 p.m.
Rodgers Library
Scholars Station
